## REPORT ON VARSHAVALI: KAHANI BUNDO KI

**DATE: 7<sup>th</sup> August 2023**

**VENUE: MULTIPURPOSE ROOM**

The rainy season for most parts of India falls between June to September and are technically known as the south west monsoons. The advent of the rain is a welcome relief from the burning heat and an absolute balm for the heart and mind. Sadly, the imbalance of the rain can be quite disheartening at times, with floods flooring some parts, as well as, droughts drubbing others. Yet, the rainy season is an important season for the country where a large population is dependent on agriculture. The rains in many ways make or break the economy.

At the same time, the monsoons also have a very large role to play on the culture of the society. The rain Gods are always beckoned with much fervor because rains have always been associated with prosperity, greenery and a good cropping season. A lot of festivals are also celebrated during the monsoon season and though they do not necessarily have much bearing on the economics or financial considerations, they are a huge part of the social and cultural fabric of the nation.
