BEACH CLEANING

SANJANA KUMTAKAR
Roll no 06
F.Y.B.E.d

INTRODUCTION

Beach cleaning is a crucial environmental activity aimed at removing litter, plastic waste, and debris from coastal areas. It helps protect marine ecosystems, maintain the natural beauty of beaches, and prevent pollution from harming wildlife and ocean health.
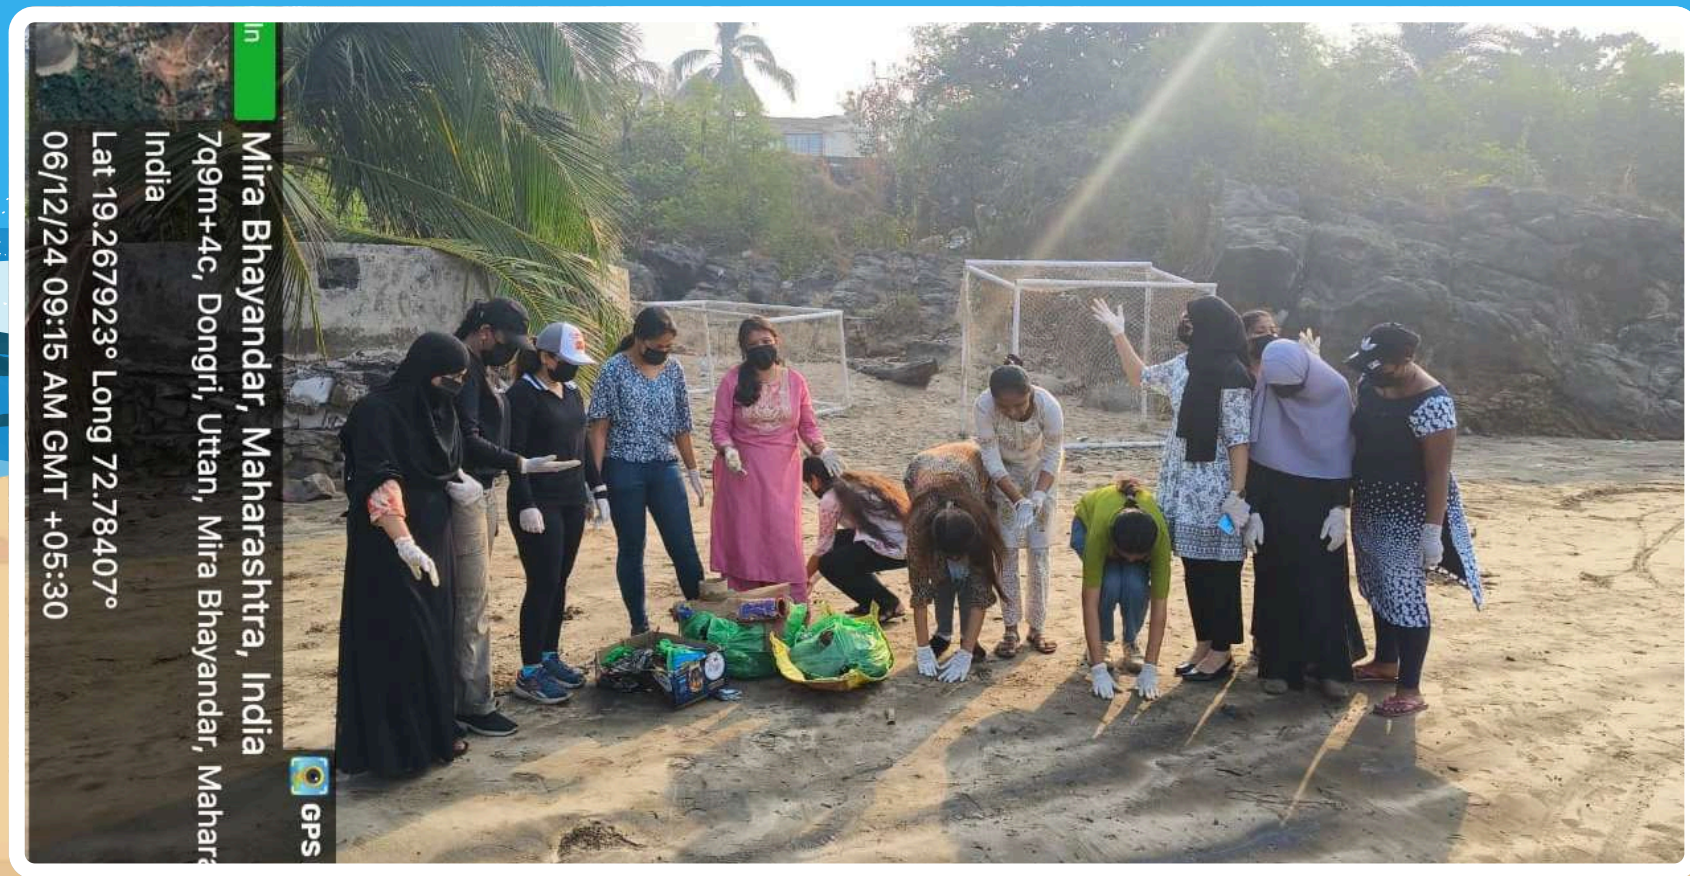

This initiative fosters environmental responsibility, raises community awareness, and encourages sustainable practices to ensure that beaches remain clean, safe, and enjoyable for future generations.

Self- Reflection

Participating in the beach cleaning drive was a truly eye-opening experience for me. It made me realize the extent of pollution affecting our natural resources and the importance of taking responsibility for our environment. The activity not only gave me a sense of accomplishment but also deepened my commitment to sustainable practices and protecting our planet.

Skill Development

- Developed environmental awareness by understanding pollution's impact on ecosystems.

- Enhanced teamwork skills through collaboration and effective communication.

- Improved problem-solving abilities by addressing challenges during the cleanup.

- Built physical endurance through manual work and outdoor activity.

- Improved time management by completing tasks within a set time frame

Role of Teacher

Educating students about environmental conservation and its importance.

Inspiring and motivating students to take part in eco-friendly activities.

Instilling values of sustainability and respect for nature.

Creating awareness about the long-term impact of human actions on the planet.

THANK YOU
