

ROYAL COLLEGE OF EDUCATION AND RESEARCH FOR WOMEN

REPORT ON WORLD ENVIRONMENT DAY

NAME OF PROGRAM: Observation of World Environment Day

DATE: 05/06/2024

VENUE: Community-Based Activity

TIME: 11.00 am to 2.00 pm

NO. OF PARTICIPANTS: 15

COORDINATOR:

Asst. Prof. Ms. Mandrita Mitra

OBJECTIVES:

Raise Awareness: The primary objective of celebrating World Environment Day in an educational institution is to raise awareness about environmental issues and the importance of environmental conservation. This can be achieved through various means, such as organizing

workshops, seminars, or awareness campaigns that educate students and staff about present environmental challenges.

Promote Sustainable Practices: Encourage sustainable practices within the institution by organizing activities that promote energy conservation, waste reduction, recycling, and the use of renewable resources. This could involve setting up recycling stations, conducting energy-saving competitions, or initiating composting programs.

REFLECTION:

The students of F.Y.B. Ed enthusiastically celebrated Environment Day by actively engaging in tree planting initiatives within their home gardens and community areas. The students dedicatedly created posters conveying messages on environmental conservation and the detrimental impact of our changing world, particularly with the rising global temperatures. This activity served as a valuable lesson, highlighting the significance of sustainable development in safeguarding the environment for future generations. It emphasized the imperative need to take concrete actions to preserve our surroundings. Additionally, a creative writing competition was organized as part of the celebration. Participants shared their profound thoughts and perspectives on the environment, shedding light on the various challenges it faces and proposing individual initiatives to address them. This not only encouraged thoughtful reflection but also fostered a sense of responsibility towards the environment. The event provided a platform for students to express their commitment to environmental protection and inspired others to join the cause.

In essence, the Environment Day celebrations at F.Y.B.Ed. went beyond the mere act of planting trees; they became a comprehensive learning experience, instilling in students a deep understanding of the importance of environmental conservation and the role each play in contributing to a sustainable future.

LEARNING OUTCOMES: At the end of the event, the students will be able to:

- The students learned to create awareness regarding environmental issues through poster making.
- The students developed knowledge and skills related to sapling plantation in their surroundings.
- The students develop an attitude to solve environmental issues through the act of conservation and preservation.

FEEDBACK OF THE STUDENTS:

Ms. Atiyya: The poster-making activity on Environment Day helped me to show my creativity and pass the message to protect the environment for a better tomorrow.

Ms. Anushree: It taught me to be alert and work towards conserving the environment.

Ms. Kirti: As a teacher trainee, I can adopt such activities like poster making, tree plantation, slogan writing and incorporate them in my teaching about the environment to my students in future.

GLIMPSES OF THE ACTIVITY:
