Be the Change, Act for the Planet!

OBJECTIVES:

- To spread awareness about environmental conservation and cleanliness among students and the local community.

- To encourage students to actively participate in protecting nature and maintaining public spaces.
- To promote the importance of community service and teamwork.
- To celebrate Earth Day in a meaningful and impactful manner.

SKILLS DEVELOPMENT:

- Students developed teamwork skills by working together efficiently during the cleaning activity.
- Students enhanced their sense of social responsibility through active participation in community work.
- Students improved their observation skills by identifying different types of waste and understanding their impact.
- Students showed leadership qualities by taking initiative and guiding others during the activity.

LEARNING OUTCOMES:

- Students understood the importance of maintaining cleanliness in public places like beaches and how their actions can impact the environment.
- Students gained awareness about the harmful effects of plastic pollution on marine life and ecosystems.
- Students developed a sense of responsibility and commitment towards protecting nature.
- Students learned that collective efforts and teamwork can bring significant positive changes in society.

REFLECTION:

On 18th April, we visited Manori Beach to celebrate Earth Day in a meaningful and responsible way. During the activity, the F.Y.B.Ed. students along with two in charge teachers cleaned plastic waste from behind the big stones and nearby areas for around 3 hours. This experience made the participants feel extremely happy and satisfied because they were able to contribute to society and the environment in a positive way. While cleaning the beach, they realized how much plastic waste is carelessly thrown by people and how harmful it is for marine life and nature. It made them more aware of their own responsibility towards keeping their surroundings clean and protecting the environment. They also felt proud to be a part of this community service activity, as it gave them a chance to do something meaningful beyond academics. Working together with their classmates made the experience even more enjoyable, and it strengthened the bond and teamwork. This activity has motivated the students to continue such efforts in the future and to spread awareness among others about the importance of

cleanliness and environmental conservation. Overall, it was a very memorable and enriching experience that taught the participants that even small actions can bring about a big change.

FEEDBACK FROM STUDENTS:

Pragati Bhati: Cleaning the beach made me feel proud and responsible. It was a great experience to contribute towards nature.

Kainat Saudagar: This activity helped me understand the importance of cleanliness. I felt very happy and satisfied after doing this work.
