

Royal College of Education and Research for Women

Megh Malhar: The Rhythm of Nature

Date: 1st September 2025

Venue: Multipurpose Hall

Time: 11:30am onwards

No. of Participants: 80

Objectives:

1. To celebrate the beauty and significance of nature through music, poetry, and art.
2. To create environmental awareness and encourage sustainable practices like plantation.
3. To promote the creative and cultural talents of students through performances and recitations.
4. To foster a sense of unity, appreciation, and respect for the environment among the participants.

Reflection:

The event “Megh Malhar: The Rhythm of Nature” was a vibrant and meaningful celebration of nature’s charm and importance of water for sustainability. The Chief Guest for the program was Mr. Subhajit Mukherjee, Ambassador of Majhi Vasundara Abhiyaan. The program consisted of cultural performances and expert talk on rain water harvesting which was attended in large number by the degree college students and teachers as well.

The program began with a welcome address followed by a prayer and prayer song, setting a serene tone for the morning. Students actively participated in various cultural performances such as poetry recitations in English, Marathi, and Hindi, group singing, and Gujarati and Maharashtrian dance performances related to celebration of rain that beautifully portrayed the harmony between humans and nature. The paper reading session highlighted the scientific and environmental aspects of the monsoon season and its influence on life.

The Chief Guest’s Talk was one of the most inspiring segments, emphasizing the role of teachers and youth in environmental conservation specifically in rain water harvesting for sustainability. The event concluded with the principal’s address, Vote of Thanks, and a soulful National Anthem.

The final Plantation Activity in the Royal College campus added a practical and symbolic touch to the theme, reinforcing the message of nurturing and protecting nature. The program was well-organized, lively, and filled with learning and creativity, truly echoing the rhythm of nature.

Learning Outcomes:

1. Students developed awareness about the importance of environmental conservation.
2. They gained confidence through stage performances and collaborative participation.
3. The event enhanced their creative expression through poetry, music, and dance.
4. Students learned the significance of unity and teamwork while organizing and participating in the program.
5. The plantation activity instilled a sense of responsibility toward a greener and sustainable future.

Feedback from Students:

1. **Neomi Marti (SY):** I really enjoyed the program, especially the poetry recitations and dance performances. It helped me realize how closely our lives are connected to nature. The plantation activity made me feel like I contributed something positive to the environment.
2. **Felishia Dsouza (SY):** Megh Malhar was a wonderful experience! I loved the theme and how every event was linked to nature. The Chief Guest's speech was very motivating and encouraged us to take small steps every day to protect our surroundings.
